

Advanced Manufacturing Specialist Job Description

CCMI, Inc. excels in CNC Routing, CNC Machining, Cut-Sheet Vacuum-Forming, and Fabrication/Finishing of plastics. We are currently seeking a full time, reliable Advanced Manufacturing Specialist to join our team. The ideal candidate possesses the abilities to work well with their hands and to work independently within a team environment with the common goal to find solutions to produce quality accurate finished products. A main attribute includes a good mechanical aptitude with a “can do approach”. Candidates need to problem solve using a logical processes, have above average organizational habits, and the ability to read and understand CAD drawings. Candidates who have experience working with plastic, wood, metal, or other substrates to build parts or components are good matches.

Skills

- Experience in working with general shop equipment, such as table saws, drill presses, routers, belt sanders, and all hand power tools.
- Must be able to read a tape measure and other measuring equipment such as calipers, veneers, and height gauges.
- Must be able to read CAD generated prints, rules, and general shop drawings.
- Must be mechanically inclined
- Must have manufacturing experience
- Must be TEAM oriented and self-motivated
- Good problem solving skills

Additional Requirements

- Must have reliable transportation and be dependable.
- Must be able to take and follow both verbal and written direction.
- Physical requirements:
 - Lifting, pushing, pulling, climbing, standing, and walking.

Pay will be based on previous experience and skill.
